THE PITCH

We put nature in fast forward.

In a forest, billions of microorganisms work on decaying plant matter, slowly turning it into humus. We recreate that process on purpose, then speed it up. The result is compost with a higher humus content, a living microbial population, and minerals your soil can actually use.

$60	2 yd	16 yd	FREE
per yard, entry price	delivery minimum	per load, maximum	delivery on qualifying loads

Windrows are turned and re-inoculated so oxygen, moisture and microbial life stay in balance.

What that means in your garden

- Higher humus content than typical compost, so it keeps working season after season.
- Improved soil structure, water holding and drainage, with far less nutrient leaching.
- Aerobic, actively managed windrows: turned for oxygen, not just left to sit.
- Inoculated with the specific microbes found in nature to break matter down faster.
- No chemicals. Feed the soil and the plants follow, without burning or shocking roots.
- Helps suppress soil-borne disease and supports strong root development.
- Screened and consistent, ready to spread straight from the truck.
- Blended with crab meal, aragonite, rock dust and micronutrients where it counts.

How to order p. 7

PRODUCTS 1 - 3

Four products. One living soil system.

Start where your soil is. Topdress with straight humus, feed beds with the blend, or go all in with biochar. Every product is priced by the cubic yard and available in bulk.

Humus Compost

$100 per cubic yard

Fully humified compost, rich in stable organic matter and beneficial microbes. Increases nutrient availability, improves structure and moisture retention, reduces leaching and helps suppress soil-borne disease. The foundation product.

Humus Blend

$115 per cubic yard

Our humus compost blended with peat moss, crab meal, and a proprietary blend of rock powders and micro-nutrients. A complete, balanced feed for beds, borders, lawns and orchards.

Terra Preta Blend

NEW

$140 per cubic yard

The Humus Blend plus biochar. The charcoal fraction holds nutrients and water and gives soil microbes a long-term home. Our most advanced blend, and the closest thing to forest soil in a truck.

NOT SURE WHERE TO START?

Most new beds start with Garden Soil, our best seller.

Lawns and orchards? Humus Blend. Topdressing an existing bed? Humus Compost. Call 207-890-3585.

PRODUCT 4

Our best seller, ready to plant.

Garden Soil is the one most customers start with: a finished, ready-to-plant soil for new beds, raised beds and full garden renovations. Everything is already blended in, so you can tip it and plant.

Garden Soil

BEST SELLER

$60 per cubic yard

The ultimate soil blend for outdoor use: screened loam combined with humus compost, peat moss, crab meal and a proprietary blend of rock powders and micro-nutrients. Ready for new beds, raised beds and full garden renovations. Our best seller, and the easiest place to start.

BEYOND THE CATALOG

Custom soil blends

We blend soil, fertilizer and other amendments to your specifications, and can bag soils in 1-ton totes. Totes palletize for forklift handling or hoist to rooftops for green roof installations.

Soil testing with Logan Labs

We have partnered with Logan Labs to give our clients customized testing and recommendations, so the amendments you buy are the ones your soil actually needs.

HOW MUCH DO I NEED?

One cubic yard covers about 100 sq ft, three inches deep.

Measure length x width in feet, divide by 100, and round up. Delivery starts at 2 yards; one truck holds 16.

Tell us the bed size and we will do the math with you before you order.

PRICE LIST

Clear pricing, by the cubic yard.

No hidden handling fees. Delivery is a flat price per load, based on your zone, and it is free once your load reaches the minimum for that zone.

PRODUCT	PRICE PER CUBIC YARD
Humus Compost Higher humus content compost	**$100**
Humus Blend Humus compost + crab meal + rock powders	**$115**
Terra Preta Blend Humus Blend + biochar	**$140**
Garden Soil Screened loam + humus compost + amendments	**$60**

Good to know before you order

- 2 cubic yard minimum on deliveries. One truck carries up to 16 cubic yards.
- Pickup discounts: $5 off per yard at 5+ yards, $10 off per yard at 10+ yards picked up at one time.

Ask us for the current Zone 4 town list when you call

ZONE 5 **QUOTE** per load

CALL FOR PRICING

Westbrook, Scarborough, Cumberland, Conway NH

How delivery works

We schedule loads Monday through Saturday and drop where the truck can safely reach, so have the pile site cleared before we arrive. Text your address and yardage and we will confirm the zone, the fee and the day. Bigger orders cost less: once your load clears the free-delivery minimum for your zone, delivery is on us.

Pickup at the Parsonsfield yard

By appointment, Monday through Saturday. Call or text ahead. Take $5 off per yard at 5+ yards, or $10 off per yard at 10+ yards picked up at one time.

Delivered to your driveway

Flat price per load by zone, 2 yard minimum, up to 16 yards per load. Free delivery once your load clears the threshold for your town.

Ossipee Organics

ORDERING

Three steps to a better garden.

01 Choose your product and yardage

Two cubic yards is the delivery minimum, and one truck holds up to 16. Not sure what your soil needs? Ask about soil testing first.

02 Email or text us the details

Name, delivery address and quantity of product. Email or text is best. Pickup orders: call or text ahead to book an appointment, Monday through Saturday.

03 We confirm the zone and the day

You get the delivery fee, the free-delivery threshold for your town, and a drop day. We arrive with screened, living compost ready to spread.

WHAT TO INCLUDE IN YOUR MESSAGE

- Your name and phone number
- Delivery address or "pickup"
- Product and number of yards
- Preferred delivery week
